

# Essential Technology

## Ventilator

Custom manifold for NA ventilator supplier. Critical care for breathing related issues

## Diesel Generator

Ensure fuel resources and condition of equipment ready to provide power in case of outages

## Diagnostic Systems

Fluid sensing and control in reagent systems used to assist diagnosis of cancer and infectious disease

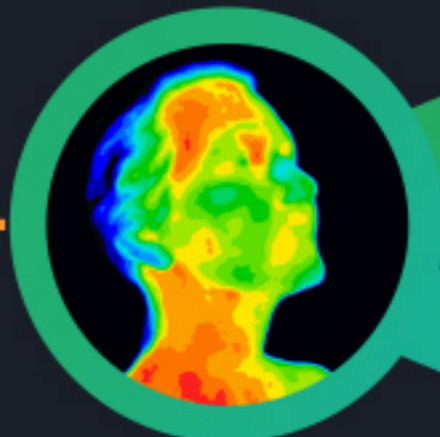

## Natural Gas Wellhead

Monitor pressure to remote wellheads and control flow with valves. Ensures safety of remote heads

## Patient Temperature

High resolution temperature controller enables high accuracy for thermal camera mfgs

## Industrial Dishwasher

Fluid control to maintain pressure and sanitize dishes on large scale

## SCBA

Monitor oxygen pressure to ensure safety of first responders.

SCBA = Self Contained Breathing Apparatus

## Transformer

Monitor levels of fluids inside transformers to ensure proper operation and safety

## In Vitro Diagnostics

Fluid monitoring and control for automated systems ensure maximum number of tests can be run accurately

## Medical Sterilization

Monitor and control flow of fluids and gases to ensure proper sterilization conditions are safely maintained
